

1.

What we learned today

- Computer science
- Hardware
- Software

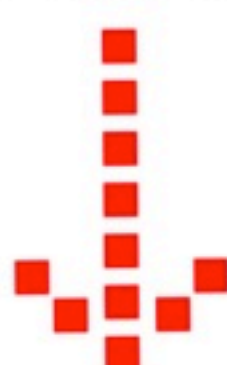

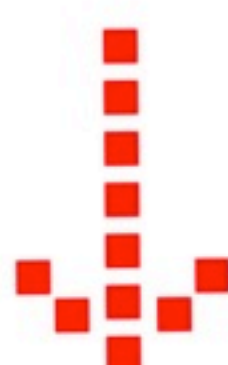

Hardware

Secondary storage
Main memory
CPU
Input
Output

Software

Application software
System software

Output:

- Display
- Printer
- Speakers
- Etc.

Input:

- Keyboard
- Mouse
- Scanner
- Etc.

System software:

- Software development tools
- Utility software
- Operating system

Computer science is as working with recipes. One part of it is how recipes are written. Another part is about the units used in recipes. Third part is figuring out what kind of tasks the recipes can be written for. Fourth part is how well the recipes work. And the fifth and final is specialised recipes.

Basic notions:

Algorithm
Program
Software
